

## About UNM TRP

UNM's Translational Radiopharmacy is a commercial nuclear pharmacy, licensed by the New Mexico Board of Pharmacy and the New Mexico Environment Department - Radiation Control Bureau.

## A Record of Innovation

In 1972, UNM opened the world's first centralized radiopharmacy. Licensed by the New Mexico Board of Pharmacy and the Nuclear Regulatory Commission, it was the first pharmacy to dispense patient-ready radiopharmaceuticals on a prescription basis.

This innovative program spawned an industry that now includes more than 400 radiopharmacies in the U.S. and 600 worldwide. These specialized pharmacies have enhanced nuclear medicine by ensuring patients have access to uniform, high-quality, time sensitive and cost-effect unit dose radiopharmaceuticals for diagnostic imaging and therapy.

UNM continues to provide clinical radiopharmaceutical goods and services to hospitals and clinics throughout New Mexico.

## SERVICE LINES

Clinical radiopharmacy products and services

Radiopharmaceutical research and development

Regulatory support for investigational radiotracers

Radiopharmacy and radiopharmaceutical sciences education
