The PGY2 Residency in Ambulatory Care at the University of New Mexico Health Sciences Center will be tailored to give the resident exposure to patients with chronic disease states in a variety of general medicine and specialty outpatient clinics. Through these clinical experiences, the resident will accumulate patient contact hours toward the NM Pharmacist Clinician certification.

Responsibilities
Along with their selected rotations, the resident will participate in a weekly continuity clinic at the UNM Family Medicine center providing pharmacotherapy management services to patients with diabetes and other chronic disease states.

The resident will gain experience in teaching by providing didactic lectures and small group instruction at the UNM College of Pharmacy. Precepting opportunities will also be available.

The resident will be responsible for completion of a research project, which may be of the resident’s design or a portion of an ongoing research project. A manuscript must be ready for publication at the completion of the residency. A presentation is required at the Western States Residency Conference.

Residency Program Objectives
1. Provide evidence based, patient-centered treatment for chronic and/or acute illnesses in the ambulatory setting
2. Demonstrate leadership and practice management skills
3. Promote health improvement, wellness, and disease prevention
4. Participate in the training of other healthcare professionals and/or students
5. Serve as an authoritative resource on the optimal use of medications for patients in the ambulatory setting
6. Demonstrate skills required to function in an academic setting
7. Accumulate patient hours towards the New Mexico Pharmacist Clinician certification
