Why New Mexico?
• Over 300 days of sunshine each year
• International Balloon Fiesta
• Hiking, mountain biking, camping, skiing, snowboarding & other outdoor activities
• Unique cultural & arts programs
• Spicy New Mexican cuisine
The specialized residency in Emergency Medicine at the University of New Mexico Hospital is designed to provide the resident with immersive emergency medicine training in a fast-paced academic Level I Trauma Center. The strong support of pharmacy services in the ED by the Department of Emergency Medicine, in addition to the close association the program maintains with the University of New Mexico College of Pharmacy, affords the resident the opportunity to train in a unique multidisciplinary environment.

The goals, objectives, and evaluation processes are consistent with those established by ASHP for PGY2 Emergency Medicine Training. Upon successful completion of the program, the resident will be prepared to provide advanced levels of pharmaceutical care as an Emergency Medicine Clinical Pharmacist.

University of New Mexico Hospitals
- Regional Level 1 Trauma Center
- An average of 90,000 ED patients/year
- New Mexico’s only academic medical center
- Highest level of intensive care for children and premature infants in the state
- On-site Cardiac Cath Lab and Poison & Drug Information Center
- Advanced Heart Failure, Joint Certification and Primary Stroke Center
